BIG SEED S.A.I.

Prices on all lines of commodities including seeds, are now on the rise. Especially alfalfa and clover seeds, due to the fact that so many are going to sow down to pasture, the land left idle from wheat and other grain and cultivated land acreage reduced under government action. So

take advantage of these extremely low prices here and order now, upon receipt of this folder to be assured of the greatest saving! We can accept orders now at these prices only so long as our present stock lasts.

COSSACK ALFALFA—The Hardiest and Best Producer of All!

For an alfalfa that will really produce an abundance of real rich forage for pasture and hay, in spite of drought and extreme winter cold, Cossack is the king of them all.

It was introduced from Siberia by Prof. N. E. Hansen, from an 8

inch annual rainfall country, where it gets 60 degrees below zero in winter with little or no snow. Get Cossack if you want the best for all

Prices per 100 lbs.: Our Top Grade \$22.50; Our 2nd Grade \$19.50.

An All-Purpose Alfalfa

For further south and east, especially where the extremes of drought and cold are not so severe Grimm is very much in demand. Altho not as hardy as Cossack it is always a good producer of a fine large crop of hay and because of its bushy growth and fine stems and leaves, makes an excellent pasture.

Prices per 100 lbs.: Our Top Grade \$18; Our 2nd Grade \$15.

DAKOTA SPECIAL MIXTURE—A Real Alfalfa Buy!

Best for Varying Conditions

If you want to get a good start in alfalfa or to seed down some of this new "allotment" land, or re-seed some of your old patches at a real low price, get this Dakota Special Mixture.

It is a mixture usually of about even proportions of Cossack, Grimm, and Dak. 12 alfalfas, thus giving in effect the combined merits of them all. It is made up from our small odds and ends of seed lots that not large enough to be offered separately or which for some minor def can't be sold as top or select grade seed. The seed is of choice qual and all right in every way for general seeding purposes. It is free front noxious weeds, though it may have some discolored seed in it, but with give you good results. It really gives you more seed value per dollar

than any other grade seed you can buy and is a money saving, money making investment for seeding your hay land or pasture.

We have offered this blend for a number of years and each year it grows more and more popular. Many after planting a hundred pounds or so as a trial have had such wonderful success with it they reorder 500 to 600 pounds more instead of making the same investment of money on a much smaller amount of higher quality named seed. It is truly a real value for the money, and should sell at a much higher price. Buy all you can now while we can still supply you at these low prices. Sow about 15 pounds to the acre for best results.

that chickens lay better when fed Proso than any other grain. Its

forage in any stage of growth or as a hay is not at any time poisonous

poses last year, and because in so many places it was practically the

only feed that was harvested, the seed this year is very scarce. If you

want some and thus be assured that there will not be a repetition of last

Due to the biggest demand in history of this grain for seeding pur-

Prices: 25 lbs. \$3.50; 50 lbs. \$6.50; 100 lbs. \$11.50.

HANSEN PROSO—The Grain That Saved the Farmers!

2/334-

In the latter part of June and first of July, 1933, when thousands of acres of farmers' grain was completely burned up by the extreme heat and dry weather, Proso, the Grain Wonder, saved the day! It was introduced from the dryland steppes of Siberia where the annual rain-Tall is about 8 inches or less, and conditions are worse than here, even in our driest and hottest years.

Thousands of farmers sowed this grain, many as late as August 1st, and yet in spite of heat and drought, harvested a crop that paid out. In many cases the only crop, for their winter feed and forage. For when Hansen Proso is cut slightly green it still matures the seed in the shock and after threshing leaves excellent hay.

Proso yields as high as 60 bushels per acre and will mature in 60 days. It makes a splendid feed for all kinds of live stock and chickens. Many farmers claim it will fatten hogs or cattle better than corn and year with grain crop failure,—order some Hansen Proso now! Plant at least a portion of your fields to Hansen Proso and be sure of one real crop! Sow 20 to 30 lbs. per acre.

Prices: 1 lb. **35c** Prepaid; By Express or Freight Collect: 10 lbs. \$1; 25 lbs. \$1.65; 100 lbs. \$3.25; 500 lbs. \$15; 1,000 lbs. **27.50**. RED PROSO—100 lbs. **\$2.75**; 500 lbs. **\$12.50**.

Tall White Blossom Sweet Clover

Prices per 100 lbs.: Our Top Grade \$5.25; Our 2nd Grade \$4.25.

Hansen White Seed Alfalfa

The newest idea in hardy alfalfas in-as-much as this variety has white flowers and white seeds, so you can tell it at a glance,—therefore it requires no registration. Supply as yet very scarce and the seed will command a good price for some years. Get a start of it now and be ready to eash in when the big demand comes. For it seems destined to become one of the leading of hardy alfalfas,—as hardy as Cossack and a bigger producer. 10 Plants 50c; 25 Plants 75c; 100 Plants \$2.50.

Dwarf White Blossom Sweet Clover

Prices per 100 lbs.: Our Top Grade \$5; Our 2nd Grade \$4.

Permanent Pasture Mixture

Seed especially blended for seeding down those "allotment acres" or re-seeding a worn out pasture. Consists of a large portion of alfalfa with other hardy pasture crops such as sweet clover, timothy, medium red, alsike, blue grass, red top, etc. which make up a well balanced permanent pasture. For best results seed about 15 to 18 lbs. per acre. For a good pasture at low cost this blend is a real buy for the money!

25 lbs. \$2.50; 100 lbs. \$8.50; 150 lbs. \$12.

CARL A. HANSEN NURSERY HARDY PLANTS FOR THE NORTHWEST BROOKINGS, SOUTH DAKOTA

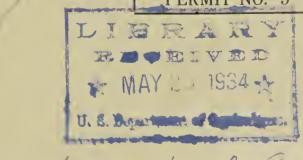

SIBERIAN FLOWERING ALMOND SPECIAL OFFERING Something New And Entirely Different

A wonderful, Flowering Dwarf Almond introduced from Siberia by Prof. N. E. Hansen and is perfectly hardy everywhere. It will bloom for days, way ahead of any Spirea or any other shrub.

Has profuse masses of lovely pink and white fraguant flowers in early spring which completely cover the shrub and form a lovely bouquet of many fine flowers. It has a fine green foliage which turns to a pretty red and gold in the fall.

Ready to Bear This Year. Prices, Postpaid 50c Each; 3 For \$1.00

HANSEN BUSH CHERRY

The New, Quick-Bearing Cherry-Easy to Grow, Sure to Produce Highly Productive—Good Flavor—Hardy Everywhere

Hansen Bush Cherries are the result of over 30 years of untiring selection work by the great plant wizard, Prof. N. E. Hansen of South

Dakota State College at Brookings

A new development in fruit culture that is gradually changing the method of plum and cherry fruit production thruout the northwest, because of the immense amount of choice quality fruit they produce on small trees on such a small area of ground.

The fruit is of good flavor and quality to eat fresh, but its most remarkable

character is best developed thru the superb jam, jelly, and cordial they make. It is of good size and comes in massed clusters, at times almost completely covering the limb. The plants bear from the ground up on low bush-like dwarf trees, rarely getting over 4 to 5 feet tall. They may be planted 3 to 4 feet apart and still have plenty of room for natural growth.

Bush Cherries usually commence bearing the year after planting, often fruit even the year they are set out, and annually thereafter. There is a

ready market for the fluit, once having been tried.

STRAWBERRIES

ING — Very productive. Easy to grow. Very hardy. 25 For 75c;

MASTADON EVERBEARING-

Largest and sweetest everbearing

Good Crop Of Fruit

FRUIT TREES

ANOKA-The Wonder Apple. One of Prof. N. E. Hansen's Greatest Introductions. Perhaps no other apple in recent times has created so much sensation or has received as much praise as this wonder apple—Anoka! It is very good to eat, large size, bright color, hardy everywhere, and a big producer, but the big thing and best part of all is that it usually bears the

second year after planting.

GOLDO APPLE—A true winter apple for the northwest originated by Prof. N. E. Hansen. Keeps in an ordinary vegetable cellar till well into March. Has the rich excellent flavor of Grimes Golden but is larger in size. A very vigorous grower, bearing very young.

DOLGO CRAB-The most wonderful jelly and pickling crab on the market. Fruit good sized, conical in shape with a most brilliant flaming red color. Bears very young. 1 pk. of fruit can make 42 glasss of jelly and 9 qts. of jam without addition of commercial or other fruit pectin,—only sugar and water.

PRICES ON ANOKA—GOLDO—DOLGO

cherry hybrid introductions. This new cherry has developed a wonderful demand and became extremely popular almost over night. Its superb sweetness and beautiful intense, wine-red flesh can't be beat. The fruit is large

and comes in clusters. A wonderful commercial fruit.

WANETA PLUM—The giant of hardy plums. Up to two inches in diameter. Highly flavored. Richly colored red skin. The most popular of the Hansen Hybrid Plums and champion of the northwest.

OPATA CHERRY PLUM-Earliest of all plums and famous everywhere for its rich, wonderfully delicious flavor. Flesh light green with purplish red skin. Very productive.

SAPA CHERRY PLUM—Usually the most productive of any of the Hansen Hybrids. Fruit very large. Extra fine sweet flavor with purple red

flesh. Bears the year after planting. Extra hardy.

HANSKA PLUM—The superb plum of applicot flavor and fragrance.

HEDGES

CARAGANA--The hardiest and best all around hedge plant. Very drought resistant. Has feathery, dense green foliage.

HEDGE ROSES-The most beautiful of all hedges. Something new and very distinctive, extremely hardy. Blooms profusely all during June and most of the summer.

Prices Per 10 Per 25 Per 100 9 to 15 in. . . . \$.50 \$1.00 \$3.50 12 to 24 in.75 1.50 5.00 1½ to 2½ ft. . . 1.00 2.00 7.50
